Pad Absorbents

Do you have spills, leaks or drips?

There are probably no industrial facilities anywhere without some type of spills, leaks or drips. Anywhere liquids are transported, stored, used, manufactured or refined, the potential for a spill exists. Spills can be found around lubricants, hydraulic fluids, cutting and/or cooling fluids, solvents and degreasers, food grade oils, paints and inks, fuel oils and liquid storage areas.

Absorbent Pads Universal

Absorbent Pads Universal are great for quick, one-time applications. Perforated, providing a perfect fit for any size spill, even in tight, narrow spaces. Universal color is ideal for MRO applications, inconspicuously hiding dirt and grime.

Item	Size	Color	Desc.	Pack

Morton® Pro Grade Ice Melter Blend

Our lowest temperature ice melter which melts down to -15° F. This combination generates heat upon contact with ice/snow. Melts large volumes of ice and snow fast. Packaged in a durable bag.

Item	Size	Pack
49800	50 lb. Bag	ea

Peladow® Calcium Chloride Ice Melters

Unlike rock salt & potassium chloride, Peladow® calcium chloride readily attracts moisture from the atmosphere, allowing it to form a liquid brine very quickly and fan out beneath the ice, breaking its bond with the pavement. Other deicers lose their effectiveness quickly when they become diluted with water. But even when diluted to 20% concentration, Peladow® keeps working down to -4 degrees F. Penetrates & undercuts ice fast & keeps on working all the way down to -25 degrees F - long after other deicers have given up. Easier on concrete & vegetation. Doesn't leave powdery residue.

Degrade-Away™ Linear Low Green Tint Liners

The Oxo-Degradable additive breaks down the long hydro-carbon bonds of the plastic reducing the film strength and eventually providing a nutrient source for microbes. These microbes eat the broken down molecules reducing what was once plastic to water carbon dioxide and reusable biomass. This process requires oxygen and can occur at the top layers of a landfill or in the presence of sunlight heat or stress. Depending on conditions, this process can take between 2 months and 5 years. 100% degradable. Meets ASTM D6954-04 for degradable plastic.
